## Tideline Aquatics Store Hours

Monday – Friday 11am-7pm  
Saturday 10am-6pm  
Sunday 1pm-5pm

## POND PLANTS WILL BE READY FOR SALE ON SATURDAY!!

I (chris) am picking up water garden plants on Friday morning! We will have them up for sale beginning Saturday. Pond fish will arrive early next week and be available on April 1<sup>st</sup>. They have been housed and quarantined by our local

supplier to ensure you receive healthy livestock! We will also be doing a three day regiment of ProForm C as a follow-up treatment after transporting the fish to Tideline. Pond Season Is Here!!! We look forward to seeing you....

NOTE: If you plan on adding new fish to your pond and you have not tested the pond water, PLEASE bring in a water sample!! We will test your pond water for free (with a \$5 purchase) to ensure the water parameters are safe for adding new fish. Remember that just because your fish are acting normally does not mean the water is safe for new fish. Established fish can adapt to poor water quality as it degrades over a long period. New fish cannot make that acclimation to adverse conditions so quickly and could be killed. All you need to bring is about a half cup of pond water.... Don't forget your water sample!
