Sunday	12pm-5pm

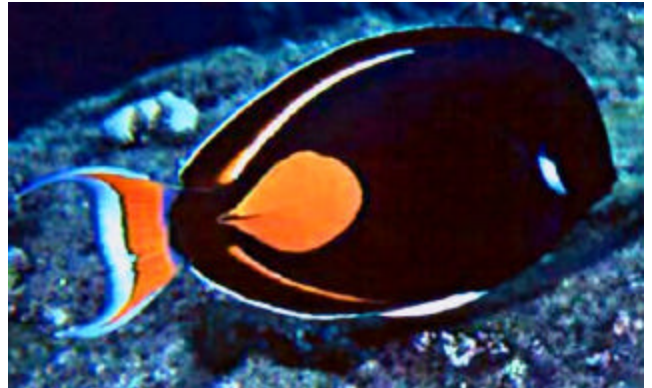

THIS ACHILLES TANG – A FISH FOR THE EXPERIENCED HOBBYIST....

There is no surgeonfish (tang) that is more wonderful as the Achilles Tang yet it is the most delicate of all surgeonfish to keep in captivity.

Achilles tangs should be kept by only the most skilled of aquarists. This fish demands the most perfect water quality, high in oxygen, low in organics with plenty of open space for swimming. This fabulous species requires plenty of regular feedings of foods that contain algae from frozen to dried marine algae. This fish will lose weight quickly if not given adequate amounts of food. Achilles tangs are also easily stressed by sudden shifts in water quality. One

should test the aquarium water weekly to ensure that the parameters always remain at the proper levels.

One of the keys to keeping this fish alive is to purchase a healthy specimen that has been properly collected. At Tideline Aquatics we only purchase specimens collected from the Hawaiian Islands. We also only purchase them from our main supplier Quality Marine. (www.qualitymarine.com) If this fish arrives thin or damaged in any way it seldom recovers. The specimens we receive from Quality Marine are always full bodied healthy fish. If you choose to purchase one of these striking surgeonfish, you should always place this fish in a quarantine aquarium of ample size to accommodate the size fish you purchase. This tang is known to be parasite prone so quarantining prior to adding to your main aquarium is strongly suggested. We run our fish through a copper regiment but the stress of catching, bagging and acclimating to a new environment is often enough to cause this species to develop problems.

The Achilles Tang is tempting but be certain you have the skills to maintain this species. They are expensive and delicate!

THE NEWEST FRESHWATER NERITE SNAIL TO HIT TIDELINE....

You know you work with a bunch of fish geeks when a new snail comes in and the entire staff (including myself) gets excited! Folks we'd like to introduce you to the Horned Nerite Snail (*Clithron corona*).

This spectacular new snail import from Asia displays a bumble bee like pattern with very cool spikes protruding irregularly all over the outer shell. This particular nerite species has a huge appetite for both brown and green algae. It will not harm live plants either! The horned nerite snail grows to about 1/2" in size and lives about 1 year. Like other nerite snails it cannot multiply in pure freshwater though it will lay eggs that will not hatch meaning it will never become a pest snail. Another interesting fact about the horned nerite snail is its adaptability to water temperature. It will thrive in water temperatures from the mid 50's to the upper 80's.

A PERFECT REEF FISH... THE ORANGE STRIPED RANDALLI GOBY...

AN ADULT RANDALLI GOBY

For whatever reason this fantastic goby is often overlooked at the store. Perhaps it is that the juveniles lack some of the vivid color of the adult fish or that we just don't place them properly.

The Randall Goby is a durable hardy disease resistant reef fish and community aquarium fish. They can be kept as a single specimen or in pairs if both fish are added at the same time. This goby prefers an environment with plenty of caves and rockwork where it will dig a burrow and guard it from fish that come too close. This wonderful goby will also associate with a pistol shrimp too though it is not required for the goby to be healthy.

Randalli gobies accept all types of frozen foods from enhanced brine shrimp to mixed frozen diets such as marine cuisine. When spooked, this fish raises its large rounded dorsal fin to display the "false eye" that is used to help confuse predatory fish. As with most other gobies, the Randall goby should only be kept in a peaceful community environment.

MARINE FISH FEATURE: THE YELLOWHEAD PEARLY JAWFISH OF THE CARIBBEAN

Jawfish are some of the most interesting marine fish available. These peaceful reef safe marine fish dig themselves out a home within hours of being introduced to their new surroundings. Jawfish will drag empty shells, small pebbles and other “construction material” to line the outside of their home. The jawfish will hover just above its new home waiting for food to flow past. These fish have human-like qualities! They turn their heads, they look up, they open their mouth wide as if to scream at their tankmates and they eat hearty like a good American.

Right now we have plenty of the lovely Yellowhead Pearly Jawfish collected from the Caribbean. These are some of the least expensive jawfish yet one of the hardest too! Jawfish accept all types of frozen foods and even dry foods once established. Pearly jawfish can also be kept in groups successfully! Just house them with peaceful tankmates and you too have own one of these jewels of the Caribbean.

NOTE!! WE FINALLY HAVE REGULAR HERMIT CRABS BACK IN STOCK IN SEVERAL SIZES....

NEW ARRIVALS FOR THIS WEEK:

FEEDER ITEMS ON THE MENU:

Feeder Goldfish, Feeder Guppies, Feeder Ghost Shrimp, Feeder Crayfish, Feeder Fiddler Crabs, Live Black Worms

NEW FRESHWATER FISH:

Dalmation Mollies, Lyretail Neon Mollies, Gold Honey Gouramis, Opaline Gouramis, Small Marble Angelfish, Small Silver Angelfish, Medium Mixed Angelfish, Small Tank Bred Bushynose Plecostomus, Horned Nerite Snails, Black Arowana (SOLD), Bloodfin Tetras, XL Longfin Serpae Tetras, Harlequin Rasboras, White Cloud Mountain Minnows, African Vampire Shrimp, Japonica Shrimp, Assorted Glofish, Beautiful Mixed Fancy Guppies, Millenium Rainbowfish, True Tigrinis Shovelnose, Medium Fire Eels, True South American Leafyfish, Green Scatophagus, Electric Catfish, African Ropefish, XL Jet Black Angelfish, XL Pairs of German Stendker Discus (Green Turquoise x Snakeskin, Red Snakeskin, Marlboro Reds) and (36) Assorted 3”-4” German Stendker Discus, Cuban Cichlids (Nandopsis tetracanthus), Tilapia Butterkopheri, Butterfly Sucker Loaches, Otocinclus Dwarf Algae Eaters, Turushuki Catfish, Clown Loaches, Polypterus ornatipinnis, African Tiger Pike, Fugu Pufferfish, Red Cherry Shrimp, Velvet Swordtails, Black Lyretail Mollies, Red Flame Dwarf Gouramis, Round-Banded Barbs (only a small number arrived of these highly sought after Rhomboscellatus Barbs), Medium Firemouth Cichlids, Medium Jaguar Cichlids, Chinese Algae Eaters, Gold Chinese Algae Eaters, Longfin Albino Bushynose Plecos, Bala Sharks, Bumble Bee Gobies, Spotted Pufferfish, Fantail Goldfish, Fancy Chinese Goldfish, Neon Tetras, Beckfordi Pencilfish, Black Phantom Tetras, Glo-fish, XL Flounders, Candy Platys, Mickey Mouse Sunburst Platys, Red Wag Platys, 24k Tuxedo Platys, Dalmation Mollys, Neon Butterfly Balloon Mollys, Electric Blue Crowntail Male Bettas, Standard Mixed Color Crowntail Male Bettas, Standard Mixed Color Male Show Bettas, Celebes Rainbowfish, Super Red Cherry Barbs, Striped Pentazona Barbs, Large German Blue Rams, Medium German Blue Rams, German Gold Rams, Tiger Oscars, Assorted Mix of Mbuna African Cichlids, L018 Gold Nugget Plecostomus, Mixed Mystery Snails, Zebra Nerite Snails, Polypterus Retropinnis, Medium Silver Arowanas, Matoro Freshwater Stingray, Black Skirt Tetras, Rummynose Tetras, Cardinal Tetras, Longfin White Cloud Mountain Minnows, Blackberry Japonica Shrimp.
